WARM GREETINGS PERIANESTHESIA NURSE COLLEAGUES,

Welcome to ASPAN's 2023 winter/spring nursing education. Nursing care and circumstances are ever-changing in today's healthcare arena. The American Society of PeriAnesthesia Nurses' (ASPAN) educational offerings are catalysts to complement your practices. Partnership and changemakers spark dynamic changes for all members through active learning.

As an ASPAN member, you have access to engaging educational programs, dynamic national experts, and nurse leaders advocating caring through science. Learning is an inspiring and powerful tool! Sharing knowledge and understanding empowers a caring community through continual learning.

ASPAN Webcasts and Seminars have a plethora of information that directly affect your nursing environment. Each session strives to provide current information accessible for all perianesthesia nurses in all practice settings, all phases, and all ages. Offerings are easily translated from evidence-based literature, standards, and guidelines to the bedside. ASPAN uses the heart and science of caring as a clear path to promote learning and share nursing evidence. This teaching and learning strategy ensure nurses are acquainted with their perianesthesia scope of practice.

Learning can be easy even in the comfort of your home or joining colleagues at a seminar. Simply find the sessions in which you are interested and register early to take advantage of early bird discounts. We also encourage you to collaborate with ASPAN on your learning needs. Understanding ever-changing practices advocates purpose and engages perianesthesia excellence for our profession and patient care.

ASPAN is accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation. Browse the brochure. You will find a vast treasure of topics and formats to meet the needs of your learning preferences. Attend an in-person seminar or visit ASPAN Learn for virtual webcasts. There are a variety of options for two-hour, half-day, and full-day programs. Each session delivers exceptional evidence-based information, which, in turn, you can quickly apply to your everyday perianesthesia practice, take information back to your workplace, or prepare for national certifications.

Nursing education is a powerful tool and transformative approach when learning is adapted to influentially change the effects of patient care and practices. It is essential for our unique specialty to advocate for all ages and phases, healthier environments, champion a culture of safety, promote autonomy and practice recommendations, and make informed decisions through clinical inquiry. ASPAN is committed to cultivating your professional skills, talent, and commitment through learning. Come grow your profession with us. Let's continue to learn to improve our specialty, advocate, and deliver exceptional care. **Be an ongoing learner by choice and lift your practice to new heights.**

Be a caring educated collaborator, through ongoing learning,

Connie Hardy Tabet, MSN, RN, CPAN, CAPA, FASPAN – ASPAN President 2022-2023
Heart and Science of Caring - Collaboration. Advocacy. Purpose. Excellence.
